Software Engineer

Vera Dias

Profile

I am a quick learner and a high-motivated individual. I've proven to be able to work both independently and with a team during my degree and previous jobs.

I love to embrace new challenges and new technologies, I push myself to do my best and learn something new every day.

Work Experience

iOS Developer @Talkdesk

- Worked closely with product managers and designers to define a rich iOS experience for the user.
- Performed technical designs and implementation of complex iOS features using Storyboard and UIKit.
- Improved product quality through code reviews, writing effective unit, functional, integration and UI tests. Also collaborating with QA on implementing automation testing.
- Developed features using Hexagonal Architecture.

QA Analyst @Blip.pt

- Analysed requirements/user stories with a critical mindset with a view towards identifying possible gaps and bugs.
- Highly involved in UAT, Functional and Regression Testing.
- Implemented Functional Tests using Protractor and JavaScript.
- Involved in a release process using Continuous Integration and Continuous Delivery.
- Tested on different mobile devices and web browsers.
- Involved in developing Test Cases and Test Plans using Target Process.
- Ensured the quality of new functionalities for Paddy Power's thousands of customers.

Education

Bachelor Degree in Computer Software Engineering @ ISEP

- Worked in an agile team in a fast paced environment;
- Learned different architectural patterns to write code with best practices.
- Learned Java, JavaScript and started Web Development with HTML, CSS3 and VueJS.

Masters Degree in Computer Software Engineering @ ISEP

- Developed applications using microservices architecture with Java, SpringBoot, PostgreSQL, Docker, Kubernetes and hosted the project in Google Cloud Platform.
- Involved in complex projects using Scala 3 and implemented Property Based Tests.

Skills

- Swift
- React
- React Native
- Java
- JavaScript
- Scala
- HTML & CSS3
- MySQL, PostgreSQL
- NodeJS
- MongoDB
- RabbitMQ
- Git
